Coming back to the use of typefaces in electronic publishing:

many of the new typographers receive their knowledge and

information about the rules of typography from books, from

computer magazines or the instruction manuals which they get

with the purchase of a PC or software. There is not so much

basic instruction, as of now, as there was in the old days,

showing the differences between good and bad typographic

design. Many people are just fascinated by their PC's tricks,

and think that a widely-praised program, called up on the

screen, will make everything automatic from now on.
